

PROPOSAL 1: SMALL BUSINESS

1. Organisation Overview

Organisation Name: Sweet Bakery

Brief History

Sweet Bakery was founded to satisfy the community's need for high-quality and affordable baked goods. It offers a wide range of products from basic items like bread, buns, rolls, cakes, and cupcakes to pies, sausage rolls, pizza, and other specialties such as croissants, cinnamon rolls, tarts, and scones. Sweet Bakery has been providing its services with a focus on quality and excellent customer support to deliver the best products.

Mission

It focuses on delivering the best value and high-quality baked goods and cakes with exceptional customer service.

Vision

To be the best bakery in the community in terms of customer satisfaction by providing affordable prices and high-quality products.

Target Audience

Its main target audience includes families, students, working people, children, and adults. It appeals primarily to those willing to purchase baked goods for their daily use and those seeking to buy cakes and other desserts for birthdays, parties, and other celebrations.

2. Website Goals and Objectives

The goal of the Sweet Bakery website is to market the business and its products and services to the target audience and provide the customers with quick access to the required information on the business.

Objectives

To showcase the menu and set prices, to inform the target audience about the Sweet Bakery, to enable fast and convenient access to the contact information, to offer the customers an opportunity to make inquiries and place orders, to market the Sweet Bakery business to potential customers and to ensure that the website is easy to use.

3. Key Performance Indicators (KPIs)

Below is a table of KPIs that could be used to evaluate the Sweet Bakery website:

KPI Aspect	Strengths	Weaknesses	Areas of Improvement
Website visitors	The website displays information about the Sweet Bakery and its products.	The website might not attract more visitors since the company has limited online promotion.	The company should market and promote the website more on social media and other digital platforms.
Product views	The website displays product names, images, and prices.	Some products have limited descriptions and details.	The website should provide more information about the available products, such as ingredients and availability.
Customer Inquiries	The enquiry form enables customers to send inquiries.	Inquiries might not be handled efficiently since there is no automated response system.	The website should provide an email or WhatsApp option to respond to customer inquiries faster
Online Sales	The order form enables customers to provide the required details about the products they want to purchase.	The orders are not handled automatically since no digital payment method is provided.	The website should provide an option for online payments and an automated ordering system.
User experience	The website has an easy navigation system.	The website lacks a good visual appeal.	The website's visual appeal should be improved by redesigning it using better themes, colours, and image sizes.
Customer engagement	The website has contact information and displays product descriptions, images, and prices.	Most aspects of customer engagement are limited, such as reviews, ratings, special offers, and social media buttons.	The website should add more customer engagement tools and options.

Overall Evaluation

The strengths of the website are the ease of navigation, the availability of product information, pictures, prices, and enquiry/order forms. The weaknesses of the website are the lack of interactivity, no online payment, and absence of engagement with the customers. By addressing the issues of the website, it will become more professional, functional, and competitive.

4. Proposed Website Features and Functionality

The proposed Sweet Bakery website will have the following pages and features:

Homepage/Welcome: To introduce Sweet Bakery and welcome visitors to the website.

Products page: To display Sweet Bakery products, including images, descriptions, and prices.

Gallery page: To display images of the bakery items.

About Us page: To provide information on Sweet Bakery's history, mission, and vision.

Contact Us page: To provide contact information, including the phone number, email, addresses, and operating hours.

Enquiries page: To enable customers to ask questions about products, prices, and services.

Order form: To enable customers to select products, specify quantities, and provide contact details.

Navigation menu: To provide links to all the pages and features on the website.

Product prices: To provide information on the prices of all products on the menu before placing an order or enquiry.

5. Design and User Experience

The Sweet Bakery website will have a clean, elegant, and welcoming bakery theme. The website design will be customer-centric and easy to navigate.

Colour Scheme: The proposed colour scheme includes light pink, cream, brown, and white to create a sweet and homey appearance.

Typography: The website will have a clean design that uses simple and elegant font. It will also use larger and bold fonts for headings and smaller font for body content.

Layout and Design: The website will have a responsive layout and design to ensure it is easy to navigate on different devices, including mobile phones and tablets. All the information on the website will be organised in a logical manner using headings and subheadings.

Images, Graphics, and Icons: The website will use images, graphics, and icons to make the website more attractive and easier to navigate. All the images will be optimised to ensure they do not take too long to appear on the website.

6. Technologies and Tools

The following technologies and tools will be used to develop the Sweet Bakery website:

Website builder: It will be used to construct the website by adding all the features and functions required.

Website hosting: It will be used to make the website accessible on the internet.

Domain name registration: It will provide the website with a web address.

Theme and template: It will be used to customise the appearance and layout of the website.

Images and videos: They will be used to make the website more engaging and informative.

Plugins and widgets: They will add extra features and functions to the website.

Yes. According to the requirements found in your assignment, we should continue working on our proposal for Sections 6, 7, and 8.

6. Technical Requirements

The Sweet Bakery website will be developed using fundamental web technologies such as HTML to create the structure, CSS to add styles, and JavaScript to add interactivity. Additionally, Visual Studio Code will be used as a code editor. It will be necessary to register a domain name, such as www.sweetbakery.co.za, and a web hosting service to deploy the website. An internet connection and modern browsers like Google Chrome will also be required to build and maintain the website.

7. Timeline and Milestones

The development of Sweet Bakery's website will be completed in several stages or weeks. The following table describes the activities to be completed during each week:

Week	Activity	Milestone
1	Organisation research	Proposal
2	Website planning and structure	Website layout
3	Website development (HTML)	Website pages
4	Website: products, photos, prices	Website products
5	Website: contact and form	Website forms
6	Styling and design (CSS)	Style sheet
7	Testing and debugging	Website test
8	Final adjustments and presentation	Final website

Milestones: Planning → Development → Content → Design → Testing → Final Website

8. Budget

The budget for developing and maintaining the Sweet Bakery website is expected to be as follows:

Item	Estimated Cost
Website tools/software	Free
Domain name	R250 – R400 yearly
Hosting	R600 – R1,200 yearly
Website maintenance	R500 – R800 Yearly
Images	R0 – R500
Total Maintenance Estimation	R1350 – R2900

Website tools such as Visual Studio Code, HTML, and CSS are typically free. Therefore, the most significant costs involve the domain name, web hosting registration, and maintenance. Additionally, images for the website can either be free or paid depending on their quality.
