

PROPOSAL 2: Small business

1. Organisation Overview

Organisation Name: Glamour Beauty Store

Brief History

Glamour beauty store is a small business that sells affordable beauty and cosmetics products. The company was created to satisfy a high demand for beauty products by young people and adults and to provide them with high-quality and cheap lip glosses and lipsticks, lashes, mascaras, creams, washes, hair products, and others. Currently, the company offers its goods for sale on a physical store and through direct customer interaction. The expected result of creating a website is an increase in sales and the spread of information about the company and its goods.

Mission

The company's mission is to offer a wide range of cosmetics and beauty products to customers and provide them with special attention by achieving the most advantageous conditions for the sale of its goods and services.

Vision

Aim of the company is to make the Glamour Beauty Store brand famous across the country by expanding the work in the field of cosmetics and beauty products and creating greater opportunities for sale through the development of the online shopping system.

Target Audience

The target audience includes:

Teenagers and young people, women and men who are interested in beauty products, customers seeking to purchase skincare products, haircare products customers, makeup users, customers searching for affordable beauty products and individuals buying gifts of cosmetics and beauty items.

2. Current Business Situation

Glamour Beauty Store majorly relies on word-of-mouth and direct outreach. Such dependence may have a negative effect on the business, considering the number of prospective clients that remain unknown to most of the target audience.

The proposed website will offer an avenue for potential customers to access information about products, their pricing, and general details pertaining to the business. In addition, it will enable Glamour Beauty Shop to advertise new products and promotions.

3. Proposed Website

The proposed website will be an attractive and easy to navigate website for Glamour Beauty Store.

The website will have the following pages: Home Page, About Us, Products, Skincare, Makeup, Haircare, Special Offers Contact Us, Home Page.

The homepage will introduce the Glamour Beauty Store and feature some of the popular products and current promotions.

About Us: This page will give an insight into the history, mission and vision statement of the business.

Products: This page will feature all the range of beauty products that the business will sell. The products will be segmented into skincare, makeup, haircare.

Skincare: This section will feature: Face cream, Face wash, Moisturisers, Cleansers, Body lotions and other skincare products.

Makeup: This section will feature: Lip gloss, Lipstick, Lip balm, Mascara, Eyelashes, Foundation and other makeup products.

Haircare: This section will feature: Shampoo, Conditioner, Hair oils, Hair food, Hair treatments, Hair styling products

Special Offers: This page will have special promotions, discounts and deals.

Contact Us: The contact page will have the contact information for the business and enable customers to send an enquiry.

4. Proposed Features and Functionalities

The business website will have the following features: Navigation bar, Product categories, Product descriptions, Product prices, Contact information, Special offers, Business information, Customer enquiry section, Product images, Simple search, Mobile responsive

The features will enable customers to navigate the website with ease and access relevant information about the products and business.

5. Design and User Experience

The business website will have a modern and elegant beauty theme. The website will be designed using simple themes to help customers navigate the website with ease.

The website will have the following features:

Attractive page headings, Product images, Navigation bar, Simple website structure and layout, Easy to read information, Product boxes and Eye-catching background

The business website will focus on providing an excellent customer experience and excellent user-friendly experience.

6. Technical Requirements

The website can be developed using basic web developing technologies.

The following software will be required to develop the website: HTML to develop the website structure, CSS to style and beautify the website, Visual Studio code or Notepad to write the HTML and CSS code, Web browser to preview the website and test it.

The website will not require advanced technologies because it is a simple business website.

7. Benefits of the Proposed Website

The proposed website will benefit Glamour Beauty Store in several ways. The website will benefit the business by providing increased visibility to its brand, promoting and advertising its products, providing a better channel of communication with its customers, increasing its customer base, enhancing credibility, and providing convenience to its customers.

8. Key Performance Indicators

The key performance indicators that will measure the performance of the proposed website are as follows:

KPI	Measurements
Website visitors Counted monthly	Measured by the number of customers contacting
Product enquiries	Measured by the number of people engaging
Customer engagement	Measured by the number of customers viewing products
Interested products	Measured by the number of customers acquired through the website
New customers	Website usability Assessed by customers' feedback

9. Strengths and Weaknesses

Strength	Weakness
Easy access to product information	Need for regular updates
Brand promotion and exposure	Existence of initial costs
Enhanced outreach	Potential lack of access to the internet
Improved professionalism	Risky nature of internet security
Facilitated product promotions	Possible unavailability of advertised products

Areas for improvement

The weaknesses of the proposed website can be addressed by ensuring continuous updates and improvements to the website, deleting unavailable products and updating product details, and maintaining and upgrading the website.

10. Funding and Budget

Item	Cost
Website development and design	R2 500
Web domain registration	R300
Website hosting	R800
Product photography	R1 000
Maintenance of the website	R500
Total Estimated Cost	R5 100

The above budget is a prospective analysis; therefore, the actual cost may differ depending on the designs and features selected.

11. Project Timeline

Activity	Duration
Planning and requirements	2 days
Website design	3 days
HTML development	4 days
Adding products and information	2 days
Testing	2 days
Corrections and improvements	2 days
Final launch	1 day
Total	16 days

12. Conclusion

The proposed Glamour Beauty Store website will empower the business with a convenient online presence. The site will enable the organization to offer its beauty, skincare and hair care products to a larger audience, as well as provide them with the needed information and contact details to facilitate engagement. In addition, the website will enable Glamour Beauty Store to advertise and promote the organization's products and services, as well as enhance its business's reputation in the market. Thus, the website, if regularly updated and maintained, will help the business grow exponentially.
